

# School Internet Services

High speed internet **enhances** every level of education, however we understand that using the internet comes with its own set of risks. We have compiled a **complete** internet solution for schools ensuring your internet is **fast** and **secure**, using technology used in over 8,000 schools across the UK, as well as giving you the support you need to keep pupils safe online.

NCI have been providing internet services for 8 years and have developed close working relationships with core UK internet service providers. We work closely with Schools in the South West so we understand your requirements and tailor our services to ensure that you get exactly what you need.

## What do NCI Internet Services include?

We offer a complete internet solution designed specifically for schools, ensuring you get the most reliable and secure internet possible. The package includes:

- Secure internet connection
- Web content filtering
- E-safety training and support
- Microsoft web-based email
- Online document sharing and storage
- Technical support- remote and on-site

## Internet Connection with Firewall

There are numerous types of internet connection and all are dependent on your location. We perform a location check to establish the correct connection type then recommend the most cost effective connection to fit you School's requirements.

Additionally we are able to tailor a solution using more than one connection type to provide additional bandwidth, resilience and a backup service if required.

### Security

A fully managed firewall secures your data and internal network by scanning all traffic in and out of your network for viruses, spyware, malware and hacking attempts.

## Web content filtering

**Protect pupils from inappropriate content without limiting online learning.**

We work with leading educational web content filtering provider Netsweeper which is used by over 8,000 Schools in the UK.

It is easy to configure and allows you flexibility to setup and manage different levels of filtering for different groups. For example, you could block social networking during the day but permit it at lunchtime. Or you could restrict Teachers to certain sites during school hours but after school remove any restriction. Policies can be setup by user groups, times of day or both.

## E-safety training and support

We understand the dangers of the internet so we offer e-safety support and training for your staff. Our e-safety package includes:

Online e-safety training (on-site training available as an optional extra)

A comprehensive audit of your school's e-safety policy and procedures by an e-safety expert together with a comprehensive action plan detailing any changes that may be required

Information and resources to assist you to fill any gaps in your e-safety policies and practices

Expert e-safety advice on tap for a year via our email helpline

## Microsoft web-based email

Web-based email means that your email is not hosted on-site, you access it using the internet. There are many benefits to this solution including:

Access your email, contacts and calendar from anywhere, on any PC

Create and share your calendar easily with colleagues

Large 10GB inbox

Retain your website and email domain e.g. name@myschool.cornwall.sch.uk

## Online document sharing and storage

Easily store files and documents online in a password-protected environment. You can access, view and edit your online documents from home, the classroom, the library, or virtually any PC or Mac that is connected to the Internet.

## Why work with NCI?

We are a local company and can offer face to face service and on-site support

Our solutions allow you to retain your existing email and website domain

We have experience working with local schools and understand educational requirements

We are focused on all areas of ICT therefore can provide additional services for other parts of your ICT, including IT support audio-visual solutions and ICT suite design and installation

We have a dedicated education team and a dedicated technical help desk to ensure prompt service

# ICT Support and Solutions for Schools
